## SAFER\* PAINT AND VARNISH REMOVER (GEL)

NON-METHYLENE CHLORIDE  
NON-CAUSTIC

EP Patent No. 0925335 US Patent No. 6632782

### Floor Tile Cleaning

#### Directions:

1. Apply **Safer\* Paint Remover** gel generously on to paint spots.
2. Leave for 1 hour.
3. Remove softened paint by scraping with a tool or wiping with a damp cloth, as appropriate. Very thick paint spots will need to be treated again and left for an extra 10-15 minutes. Repeat if needed. Any thickness of paint can be removed.

When all paint spots are removed, the tiles will have "clean spots" which will give a mottled effect.

4. To deep clean the tiles, to give an even finish, apply a thin coating of **Safer\* Paint Remover**, using a paintbrush.
5. Leave for 10 to 15 minutes.
6. Wash off using warm soapy water. Rinse and allow to dry.

**CAUTION.** **Safer\* Paint Remover** contains detergents and will be slippery.

**Safer\* Paint Remover** will remove nail polish and acrylic nails.  
Use rubber gloves if preferred.

The word Safe has been changed to Safer\*. **All products are SAFER\* than products based on highly flammable methylal or toxic methanol.** This change is to comply with European Advertising regulation requirements. Our products remain the same fast acting, non-toxic, low odour products which have been enjoyed by our customers since 1998. Thank you for your continued custom and support. Best wishes, Action Products Ltd. Aug. 2012
